PROFESSIONAL SUMMARY

6th-semester Informatics Engineering student specializing in Game Design, Game Artist, UI/UX, Mobile Development, and Quality Assurance. Experienced in structuring Game Design Documents (GDD) and integrating Digital Game-Based Learning (DGBL) mechanics to enhance user engagement. Active participant in the local game development ecosystem, notably Game Jam +. Aspiring to build a robust career in the game industry, aiming for opportunities both locally and in Japan, supported by dedicated Japanese language proficiency studies.

EDUCATION

Pasundan University

Bachelor of Informatics Engineering; GPA: 3.56 | September 2023 – Present

- Developing a gamified mobile application for Japanese language learning utilizing Flutter.
- Awarded "Best Team" in Programming Practicum I for designing and developing a comprehensive desktop-based logistics and inventory management application.
- Active member of the Student Activity Unit, DKM Ulul Albaab (2024 – 2025).

SKILLS AND PROFICIENCIES

- **Creative Tools:** Gamification, Game Design Documents (GDD), Level Design, Unity, Figma (UI/UX), Inkscape (2D Vector), Aseprite (2D Pixel Art), LMMS (Audio Production).
- **Programming & Frameworks:** C#, Dart, Java, PHP, Flutter, Laravel, Tailwind CSS.
- **Project Management:** Agile-Scrum Methodology, Sprint Management, Earned Value Management (EVM), Risk Mitigation, Quality Assurance.
- **Tools & Collaboration:** GitHub, Jira, Luma.

EXPERIENCES

SLIDER (Arcade Space Shooter) | Game Jam +

Game Designer | October 2025

- Conceptualized shooter game mechanics and level design, formalizing them into a comprehensive Game Design Document (GDD) using Google Docs.
- Designed regional-themed 2D vector character assets using Inkscape and produced original background audio tracks utilizing LMMS software.
- Collaborated in structuring fast-paced arcade gameplay mechanics to ensure optimal challenge curves and player engagement.

Uzzan and The Ancient Totem | Group Project

Game Designer & Artist | May 2026

- Co-developed a 2D Action Platformer game within a structured team environment.
- Intensively managed task distribution with co-developers to program movement mechanics and design levels.
- Drafted design documentation and organized visual assets to ensure technical alignment, achieving project milestones on schedule.

PROJECTS

SIKO (Digital Event Ticket) | October 2025

- Developed an online event ticketing web application (inspired by luma.com) utilizing Laravel 12.
- Implemented the Livewire framework to enhance UI component interactivity and launched an integrated event registration management page via the Luma platform.
- Managed version control and collaboration workflows using GitHub.

MIRAIku – Japanese Course | May 2026 – Present

- Mobile-based Japanese language learning application developed utilizing the Flutter framework within a Windows 11 environment.
- Managed team workflow (Michibon Lab) and developed user interfaces for learning materials, interactive quizzes, and vocabulary exercises (Hiragana, Katakana, and Kanji).
- Ensured optimal application performance and smooth deployment by managing the Android SDK toolchain.

ADDITIONAL INFORMATION

- **Languages:** Indonesian (*Native/Bilingual Proficiency*), English (*Professional Working Proficiency*), Japanese (*Actively studying Hiragana, Katakana, and Kanji; preparing for JLPT to support future career goals in Japan*).
- **Availability:** Actively seeking internship opportunities in Game Design, UI/UX Design, Mobile Development, Quality Assurance and Highly enthusiastic about contributing to creative, fast-paced game production pipelines and innovative digital experiences.
- **Portfolio:** <https://ahmaddzakis.github.io/portfolio>.
